

DOT Senior Staff Emergency Cadre- Located at Mt. Weather. The FAA person would report to Mt. Weather when DOT activated the DOT COOP plan. Currently the only person on this list is the Administrator. The DOT Special Cadre would almost certainly be activated and located at Mt. Weather when the Administrator arrived.

*KATE LANG
ERIC HARRELL*

DOT Special Cadre- Located at Mt. Weather. Real name is "National Emergency Management Team (NEMT)". Two FAA personnel are currently assigned: Eric Harrell of ATS and Kate Lang of ARP. These people routinely report to Mt. Weather throughout the year on a rotational basis with representatives from the other DOT agencies. They would probably be activated full time in the event of DOT COOP.

RTS- Located in Maryland (FAA COOP site, it is also referred to as Site A). Full activation consists of approximately 141 FAA personnel (list 1 attached). This facility is activated at the discretion of AOA/ADA. We have recently developed two partial activation levels, COOP Light and Mini COOP. COOP Light consists of approximately 43 FAA personnel from various lines of business (list 2 attached). The purpose is to establish an advance team in preparation for a full COOP activation. Mini COOP consists of approximately 14 FAA personnel from the operational lines of business (list 3 attached). The purpose is to establish a redundant operational capability at a remote location.

DOT Crisis Management Center (CMC)- Located at DOT Headquarters. Activated at the discretion of S-1 in response to crisis situations. It normally operates on a 24/7 basis. The FAA provides 9 rotational watch standers who represent the agency. During the most recent activation the majority of the questions asked by DOT were concerning air traffic. It was decided that a team of air traffic personnel would augment the originally assigned 9 members, thereby giving FAA 2 people on each shift (one original member and one air traffic). The Air Traffic augmentation personnel and 9 original members are identified at list 4. This group may also relocate to Mt. Weather in the event of DOT COOP activation.

Office of Joint Chiefs of Staff (OJCS) Liaison- Pentagon remote location. The FAA provides one operational representative at the request of DoD. Currently Ricky Hostetler from Air Traffic is the assigned FAA representative.

Note 1: In the event that FAA had to relocate to the RTS as a result of FOB10A not being habitable (asbestos, etc) GSA would provide the agency with contracted space in the Washington area for approximately 187 personnel (this location is often referred to as Site C). It would take at least a few weeks for GSA to locate this contracted space. The purpose of Site C is to provide support for the staff located at the RTS. If GSA is unable to locate suitable space in Washington the support staff may be relocated to the Technical Center (referred to as Site D). Sites C and D are strictly administrative support spaces.

Note 2: The Longmont, Colorado, Emergency Operations Facility (which is located in the basement of Denver ARTCC) is known as Site B. It has limited capabilities and would probably be the FAA's last choice in an emergency scenario.
